## What's new?

### IMPROVING QUALITY

CRC is thrilled to have recertified their NDT NADCAP and AS9100 certifications for 2023. All in thanks to our Super Star Quality team, led by our very own Quality Manager, and NADCAP voting member, Charissa Kobyluck. Charissa joins our team at a perfect time for the company's growth, with 24 years in the Aerospace industry, with a tenure of 20 years in Metal and Chemical Processing.

### SEMI-BRIGHT SILVER

in the market for some Semi-Bright Silver Plating? CRC has you covered! CRC is excited to reintroduce our Semi-Bright line. CRC is currently plating for ASTM-B700 and QQ-S-365 compliant specifications and is more than ready to work on Prime specifications approval upon customer request. Interested? Reach out to our highly skilled and friendly estimator team for a free quote today!

## PRESIDENT'S CORNER

Even after 68+ years, CRC continues to evolve. Our new initiative, "People Not Parts", brings customers to our morning huddle to speak directly to our leads and supervisors.

This gives our employees an understanding of the needs and requirements our customers face. In turn, this gives our customers a better understanding of our internal processes and discussions on a daily basis.

The relationships that are created through this interaction create personal connections which serve both parties well. If you would like to be a part of the initiative please reach out to our VP of HR, Safety, and Compliance, Gilbert Burgos at [hr@chemresearchco.com](mailto:hr@chemresearchco.com) or call direct at 602-288-0392.

Cheers to new beginnings!

Tony V. Bouie  
President/CEO

## Continued...

### INVESTING IN THE FUTURE

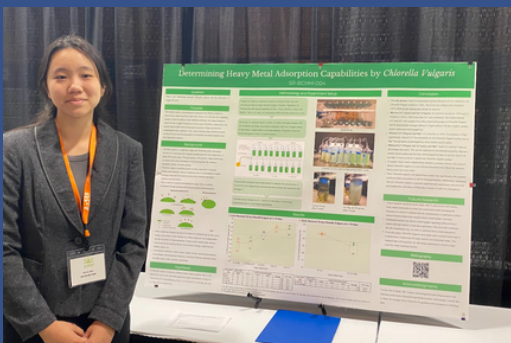

As CRC continues to embrace the upcoming quarters, Investing in new equipment is at the forefront of the company's strategic approach.

- Investing in new equipment for our Grind department will help reduce our On Time Delivery (OTD)
- Upgrading our Paint Booth to a Climate controlled environment will help the company combat the summer heat!
- Our Chrome Department will soon be more electrifying as our existing rectifiers will be upgraded to the newest state-of-the-art rectifiers.

## SUPPORTING THE COMMUNITY

### CONGRATULATIONS ALICIA!

CRC is proud to recognize Hamilton High School Junior Alicia, who recently participated in the Arizona Science and Engineering Fair (AZSEF) after winning First place in the Biochemistry Category at Hamilton Invitational Science and Engineering Fair (HISEF) for her experimental work on Algae growth in heavy metals. Our very own laboratory & WWT Manager, David Weed, assisted Alicia with testing her samples at ChemResearch. Well done, Alicia!

### FRC TEAM 6413

Degrees of Freedom (DOF) is off to Houston, TX, to compete against hundreds of other qualifying teams from around the world for a chance to showcase DOF's core strength! The team of high school students led DOF to an 8th-place victory at the AZ East Regional competition. CRC is ecstatic for these young minds and we wish them well in their competition! Go FRC TEAM 6413!
